STI-6400 Exit Stopper Reset Instructions

1) Turn the unit off and disable all power to the unit by removing the battery. If you have used the 12-24 connection option, then please ensure this is disconnected from your power source.

2) Reset all the internal "Dip" switches to their factory defaults using the below chart. (Greyed boxes are the factory settings)

SWITCH SETTINGS	1	2	3	4	5	6	7	8
Arming - immediate	OFF*							
Arming - 15 second delay	ON							
Trip - immediate		OFF*						
Trip - 15 second delay		ON						
Shut-off based on duration (switches 4 & 5)			OFF*					
Shut-off approx. 3 sec. after door closes			ON					
Duration - 30 second alarm				OFF*	OFF*			
Duration - 180 second alarm				OFF	ON			
Duration - continuous alarm				ON	OFF			
Duration - annunciator mode				ON	ON			
Low battery detection ➲ ON						OFF*		
Low battery detection ➲ OFF						ON		
Volume - High							ON*	
Volume - Low							OFF*	
Relay Function ➲ OFF								OFF*
Relay Function ➲ ON								ON

3) Before turning the unit back on, ensure the two reed switches (small, rectangular, red magnets) are in very close proximity.

4) Restore the power and turn the unit back on.

Note: If you wish to change any of the switches, please follow step 1, then change them in step 2. Afterwards, ensure you follow steps 3 & 4 accordingly. This process must be performed any time the unit requires alteration.
