

## DorMag SmartSound

The most advanced listening fire door magnet

DorMag SmartSound is a wireless fire door magnet that holds fire doors open legally, automatically releasing them to close when the fire alarm sounds. DorMag SmartSound is ideal for areas with uneven floors and environments that require a concealed hold-open solution.

### Benefits

Compact and discreet solution

Flexible fitting options

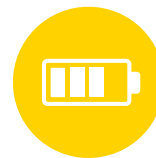

Smooth and effortless operation

Easily installed retrofit solution

Advanced SmartSound technology

Battery powered

# DorMag SmartSound

DorMag SmartSound uses advanced sound recognition technology, which allows it to identify sounds more accurately.

DorMag SmartSound is easy to install and operate. Simply mount the DorMag unit to the wall and attach the keeper plate to the door. DorMag is a battery powered device, allowing a quick and effortless installation with no hard wiring or long cables.

DorMag can be installed in multiple positions behind the door. Its compact design allows a discreet and retrofit solution.

“ I am so proud of this product and excited by the reception it has already received. When you delve down into the technology it'll soon become clear how DorMag has taken door magnets to the next level. ”
